POLYDAMIC®

Certificate No : 6297

Globalisation while preserving the environment !

Polydamic Holdings Sdn. Bhd. was incorporated on 10 March 1996 with Mr. Jacky Tan Eng Seng as the Managing Director. It was borne out of a passionate dream of Mr. Jacky Tan, the importance of a pristine environment free of pollutants. He set out to help heal the environment by the way he knows best, the manufacture of innovative equipment and environmental consultation services which help to reduce pollutants when applied in different industries such as chemical, electronics, pharmaceutical, rubber glove, palm-oil, electroplating, water treatment and many others.

In the ever increasing industrialization of countries around the world and rampant pollution as a by-product of various industries, **Polydamic** contributes to reducing environmental pollution through the promotion of the usage of our environmental control equipment and systems in and outside Malaysia. Our company helps to heal the environment by manufacturing various high quality and reliable pollution-reducing products for use in industries which release pollutants into the air, land and water.

The company aims to remain as the leading environment control equipment manufacturer and also environmental engineering services and

solutions provider which includes professional consultations, designing, development and manufacturing in and outside the region such as the air pollution control system; chemical and corrosion control system; chemical and process piping systems; fiberglass engineering and fabrication; industrial engineering and machinery; fans; local exhaust ventilation as well as Department of Environment submission.

Polydamic is staffed by an elite team of highly dedicated and competent people that will meet all our customers' needs and specifications. The company has provided environmental solutions for all kinds of industries over the years and has gained extensive experience, knowledge and expertise which are continuously updated.

Our export market includes Indonesia, Philippines, Singapore, United States of America, Vietnam, Thailand, Sri Lanka and Middle East.

The company has won several reputable awards including the prestigious 5th Golden Bull Award in 2007; the 6th Asia Pacific International Honesty Enterprise-Keris Award, 2007; the 3rd Asia Pacific Super Excellent Brand-Service Excellent Award 2007 and SME recognition Award, 2008. The Company is also certified via the ISO 9001:2008.

We Specialize in:

- ❖ Design, Development, Manufacturing & Installation Of Air Pollution Control System
- ❖ Chemical Piping & Corrosion Control System
- ❖ Gloves Line Engineering Support System
- ❖ Exhaust & Ventilation System
- ❖ Fiberglass Engineering & Fabrication Works
- ❖ Plastic Engineering & Fabrication Works
- ❖ Consultation For DOE Application And LEV Assessment

Fiberglass Engineering & Fabrication Works

- FRP Chemical Process Tanks
- FRP Beacon Tower (Light House)
- FRP Mixing Tanks
- FRP Scrubber And Blower
- FRP Roof Sheets

Advance & Fully Automated Filament Winding Machine

Consultation For DOE Application & LEV Assessment

- Registration No. JKPP HIE 127/171-3/2 (43)

Completed Projects

● FRP Beacon Tower (Light House) Installed At Straits Of Malacca

● Scrubber Export To United State Of America

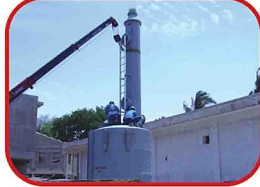

● Scrubber Export To Middle East

● 4 x 100m³ FRP Storage Tanks For Palm Oil Industry

● Online Chlorination System For Glove Industry In Indonesia

● Scrubber Installed At Sri Lanka

● Offline Chlorination Tumbler Exports To Bangkok, Thailand

● Scrubber Export To Vietnam

● Most Largest Single Stage Scrubber In Malaysia

● FRP Clarifier For Waste Treatment Plant In Shanghai, China

● FM Approved Exhaust System For Wafer Technology Industry

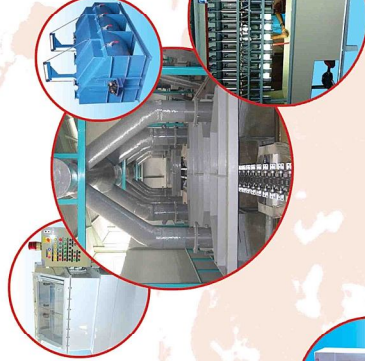

● Online Chlorination System For Glove Industry In Malaysia

Glove Line Engineering Support System

- Online Chlorination System
- Chlorination System
- Water Filter Test System
- Glove Transfer System
- Latex Storage Tanks

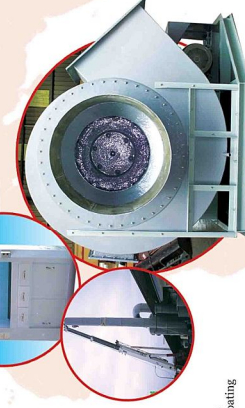

Design, Development, Manufacturing & Installation Of Air Pollution Control System

- Fume Scrubber System
- Chlorine Emergency Scrubber System
- Dust Collector System
- Venturi Scrubber System

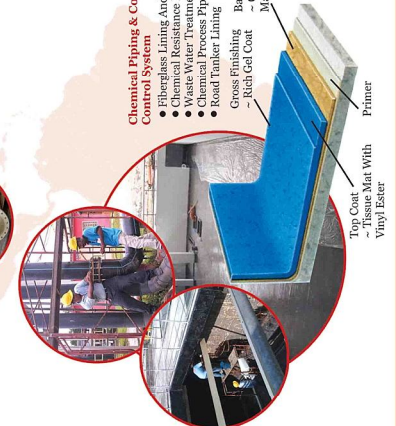

Exhaust & Ventilation System

- Design, Fabrication And Installation Of Exhaust System
- Local Exhaust Ventilation System
- FRP Centrifugal Fan
- Local Exhaust Ventilation System
- Exhaust Hood, Exhaust Duct And Control Damper

Chemical Piping & Corrosion Control System

- Fiberglass Lining And Lamination
- Chemical Resistance Protection Coating
- Waste Water Treatment Lining
- Chemical Process Piping
- Road Tanker Lining
- Gross Finishing
- - Reticel Coat
- - Base Coat
- - Chopped Strand Mat With Vinyl Ester

Plastic Engineering & Fabrication Works

- CPVC Chlorine Degasser
- PPR Hydrogen Degasser
- PVC Decomposer Tank
- L-Shape PVC Ducting
- PP Tanks & Etc

FIBRGLASS EXHAUST FAN

POLYDAMIC is the manufacturer of chemical resistant FRP centrifugal exhaust fan. Our exhaust fan is durable, reliable and efficient, even in the most challenging environment. Our fan capacity ranges from 200CFM up to 50000CFM, and above. For high pressure application, select from our HP range.

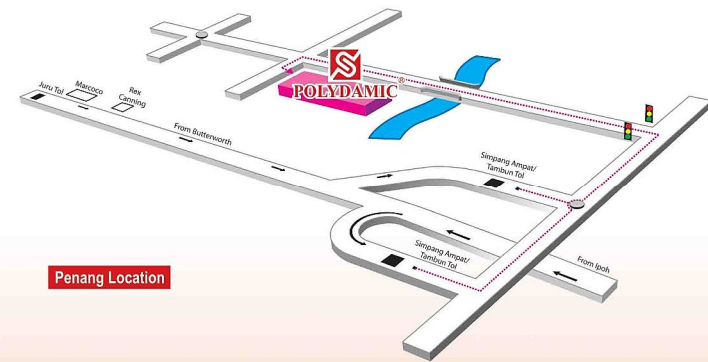

Contact us for more information. Our team of qualified experienced staff will attend to your enquiry.
